Address (if different)_____ Home Phone_____ Work Phone_____

CONSENT FOR DENTAL TREATMENT:

Before any dental procedures are performed including radiographs, diagnostic aids, local/topical anesthesia, nitrous oxide, oral sedation or general anesthesia this signed permission statement must be obtained from the parent/guardian. Some risks and complications are known to be associated with dental/oral surgery procedures, although their occurrence is not frequent. The most common complications associated with pediatric dental treatment include: nausea following the administration of topical fluoride rinses, biting tongue/lip following the administration of local anesthesia. Less common complications include: numbness, infection, prolonged bleeding, discoloration, vomiting and injury to nerves near treatment site, fracture of tooth root, which may require additional surgery for removal. Children with HEART disease are required to take antibiotics before and following dental treatment to minimize the risk of sub acute bacterial endocarditis (heart infection). You, the parent/guardian, will be informed of ALL dental services and fees for services BEFORE any are rendered to your child.

I hereby certify that the foregoing information is correct and that I have read and understand this consent form.

Signature of Parent or Guardian_____**Date**_____

Please print name _____

History Update: The parent or guardian who accompanies the child at each visit is responsible for payment at the time of service unless prior arrangements have been approved.
I have reviewed my child's health history and it is correct.
